

Constructing Thin Surface Treatments for Asphalt Pavements

Date: February 4, 2027 **Time:** 1:00-3:00pm PT **Location:** Virtual
Cost: \$20 per person

Summary:

Choosing the proper surface treatment can add life to pavements and make the best use of an agency's pavement preservation budget. This 2-hour virtual training introduces thin surface treatments, including slurry seals, microsurfacing, and chip seals.

Intended Audience:

- ✓ Personnel who select pavement preservation treatment strategies to be used on road networks.
- ✓ Personnel who may specify or inspect the work.
- ✓ Managers who justify the use of treatments to stakeholders.

Learning Objectives:

- ✓ Describe the types of distresses best addressed by each treatment.
- ✓ Describe recommended materials and mixtures for each treatment.
- ✓ Describe recommended construction procedures for each treatment.
- ✓ State typical performance concerns for each treatment.
